

Change for a Dollar

Effect: 4 Quarters drop out of a previously shown 1 Dollar bill.

Props Required: 4 Quarters and a \$1 dollar bill.

Method Preferably borrow a \$1 dollar bill. (Beforehand, have 4 quarters in your hand.)

As you either take a \$1 dollar bill or already have it in your hand, either one. Hold the 4 quarters behind the bill with your fingers at the ends of the bill. The front of the bill is facing the spectator. Take 1 end of the bill and flick the end from behind, basically to show it's just a \$1 dollar bill and also that your hand is empty. Now as you reach behind the bill and get ready to flick the other end of the bill, transfer the 4 quarters to the other hand. Now you have flicked both ends of the bill, showing basically both hands empty.

Now wrap the dollar bill around the hand that is holding the 4 quarters in a cone shape several times. Take the wrapped up bill in the other hand and slowly pour out the 4 quarters. You've just given them change for a dollar.
